

# DuckMommy

## Week 4 Plan

### Feature we want to deliver: Weather Notification

#### What we should do:

- Login page revised
  - Vig
- Find maps API
  - Lifu
- Find weather API
  - Lifu
- Find email service
  - Yuan or Boyu
- Find Canvas API
  - Yuan or Boyu
- Front end
  - Yuan or Boyu
- Link them altogether

#### From a user's view:

- I need to create my account or log in
- I need to set whether I want to receive weather notification
- I need to choose when I receive the notification, at a fixed time, or before class(if Canvas API is available)
- I need your website automatically get my location
- I need you to find the weather information based on my location
- I need you to send me the weather information
